To: Current and Prospective Canadian Central Office Code (NXX) Holders in NPAs 250, 403 & 780

Subject: Request for Relief Planning Numbering Resource Utilization Forecasts

In accordance with the Canadian Numbering Resource Utilization Forecast (C-NRUF) Guideline (the Guideline), approved by the Canadian Radio-television and Telecommunications Commission (CRTC) in Telecom Decision CRTC 2004-45, all current and prospective Central Office (CO) Code Holders are required to provide forecasted CO Code requirements at the Exchange Area level of detail once an NPA has entered the timeframe for NPA Relief Planning. In April 2004, the Canadian Numbering Administrator announced that both NPAs 250 and 403 had entered the relief planning window of 72-months.

In a letter dated 21 April 2004, the Canadian Steering Committee on Numbering (CSCN) requested the CNA to conduct a Relief Planning Numbering Resource Utilization Forecast (R-NRUF) for NPA 780 coincident with the NPA 403 R-NRUF required by the Guideline. The CSCN's request was based on the premise that simultaneous relief planning for both NPA 403 and NPA 780 would provide a coordinated approach for relief planning in Alberta.

Accordingly, the CNA is providing the attached R-NRUF forms for completion by current and prospective CO Code Holders in NPAs 250, 403, and 780. Current and prospective CO Code Holders are required to provide the total quantity of assigned and reserved CO Codes assigned to them as of 1 January 2006 and 1 July 2006 and a forecast of the total cumulative quantity of existing and future CO Codes forecast to be assigned and reserved as of January 1 of the next six years. These forms must be completed and returned to the CNA no later than **August 8, 2006**.

The completed R-NRUF forms must be submitted to Suresh Khare, at the e-mail address shown below, no later than **August 8, 2006**.
